PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and deploying **business websites, admin dashboards, and task management systems for real clients**. Strong in end-to-end **web development, database design**, REST APIs, and system maintenance. Experienced in handling complete project lifecycle from **UI/UX to deployment**.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Python, Java, C, SQL
- **Frontend:** React.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, Authentication (JWT), API Integration
- **Databases:** MongoDB, Firebase, MySQL
- **Cloud & Tools:** AWS, Docker, Git, GitHub, Postman, Vercel, Hostinger

EXPERIENCE

Freelance Full Stack Developer

Feb 2025 – Present

- Developed and deployed multiple business websites and web applications for SMEs.
- Integrated APIs, databases, and cloud services to deliver high-performance, production-ready solutions.
- Collaborated directly with business owners to understand requirements and implement scalable systems.

Key Freelance Projects:

- **Dream Neon Studio:** Developed a responsive web platform showcasing client services with interactive UI. Implemented modular React components and backend APIs for dynamic content management.
- **VS Enterprises Business Website:** Designed a responsive business website using React and Tailwind CSS, optimizing page load performance and user engagement. Integrated Firebase for hosting and data management.
- **Dermatology Clinic Website:** Created an SEO-focused informational website with responsive layouts, service pages, and contact functionality, increasing online visibility and client inquiries.
- **Kria Tech Business Platform:** Developed a business platform with dynamic content and automated client communication. Implemented Node.js backend, MongoDB database, integrated EmailJS, and deployed on Hostinger.
- **CA Task Management Portal:** Built a role-based full-stack task management system for a CA firm with secure authentication, admin and employee dashboards, and real-time task tracking. Developed REST APIs with Node.js/Express, MongoDB for storage, and deployed on AWS.
- **Dynamic Portfolio Platform (Admin Editable):** Built a reusable admin-driven portfolio system with real-time content updates and modular layouts for multiple clients, reducing portfolio setup time significantly.

EDUCATION

Gokaraju Rangaraju Institute of Engineering and Technology, Hyderabad

2021 – 2025

Bachelor of Technology in Information Technology

CGPA: 7.8

ACADEMIC PROJECT

- **Sign Language Recognition System:** Developed a real-time computer vision system for hand gesture recognition and speech conversion using deep learning. Implemented CNN-based classification with image preprocessing, feature extraction, and real-time inference pipelines, achieving 95%+ accuracy.
Tech Stack: Python, TensorFlow, OpenCV, CNNs, Image Processing

CERTIFICATIONS

- **AWS Cloud Foundation** – Amazon Web Services (AWS)
- **Google AI/ML Fundamentals** – Google Developers & EduSkills
- **AWS Data Engineer** – Amazon Web Services (AWS)
- **Intelligent Automation (RPA)** – Blue Prism & SSC NASSCOM

ACHIEVEMENTS

- Successfully delivered 6+ client projects including business websites.
